PROFESSIONAL SUMMARY

Dynamic web developer with a strong focus on Java full-stack who enjoys turning complex ideas into fast, simple, and engaging web experiences, and is eager to contribute to real-world products with a strong engineering team. Actively looking for entry-level opportunities where I can take ownership of features, learn from experienced developers, and add measurable value to the product and users.

EDUCATION

Godavari Institute of Engineering and Technology
Bachelor of Technology - Electrical and Electronics Engineering

Rajahmundry
2022 - 2025

Aditya Polytechnic College
Diploma - Electrical and Electronics Engineering

Surampalem
2019 - 2022

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, Hibernate, JPA

Databases and Tools: MySQL, MongoDB, SQL, Git, GitHub, VS Code, Postman

PROJECTS

DWCRA Community Portal (Full Stack)

Tech Stack: React (JSX), Spring Boot, MySQL, CSS

- Developing a robust web platform for DWCRA with secure role-based access for members, leaders, and admins.
- Built modular SPA features with a RESTful Spring Boot backend to enable group management, loan calculation, and lifetime savings tracking.
- Implemented multi-lingual support and light-dark modes to enhance accessibility for diverse user groups.

React Games-Hub

[\[GitHub\]](#)

Tech Stack: React, Vite, Tailwind CSS

- Developed a high-performance Single Page Application (SPA) gaming platform featuring 9 distinct arcade games.
- Engineered complex game mechanics (collision detection, physics loops) for titles like Tetris and Flappy Bird using React Hooks (useRef, useEffect) to ensure 60FPS rendering.
- Implemented algorithmic logic for Player vs Computer modes in Tic-Tac-Toe and Rock Paper Scissors.

Mobile Recharge Application

[\[GitHub\]](#)

Tech Stack: React.js, Bootstrap, Spring Boot, MySQL

- Developed a comprehensive telecom recharge system with distinct user and admin dashboards for managing plans and transactions.
- Implemented real-time tracking of key metrics like subscriber count and monthly revenue, featuring automated alerts for expiring subscriptions.

INTERNSHIPS

SkillDzire

Virtual

Java Full Stack Intern

Jan 2025 - Mar 2025

- Developed and maintained full-stack applications using Java, Spring Boot, and React.
- Implemented REST APIs, secure authentication, and responsive UI components while following Agile methodologies.

ExcelR Edtech

Virtual

MERN Stack Developer Intern

6 Weeks

- Developed full-stack web applications using **MERN Stack technologies**.
- Built dynamic user interfaces and implemented RESTful APIs, enhancing technical and collaboration skills.
